UX/UI Designer specializing in **0 → 1 product launches** across agency, startup, and freelance environments. Expertise in crafting intuitive experiences for **web and mobile**, managing the full lifecycle from user research and journey mapping to high-fidelity delivery. Proficient in **AI-driven UX**, accessibility-first design, and seamless agile cross-functional collaboration.

EXPERIENCE

Freelance | UI/UX Designer

Aug 2025 – Present | Remote

Own the complete design processes, taking the products from 0 → 1, UX design across **web and mobile products**, delivering scalable, high-fidelity solutions

Worked on two products, creating **70+ mobile screens** and **10+ desktop screens, over 10 user flows**, and **20+ components**.

Conducted user research and usability testing (10+ sessions), translating insights into improvements that **reduced task time by ~20%**

Designed for **accessibility, trust, and diverse user groups**, improving service discoverability and user confidence

Collaborated with cross-functional teams to ensure **smooth design-to-development handoff and implementation accuracy**

Vivax | Visual & UI/UX Designer

Oct 2024 – Aug 2025 | Lucknow (Hybrid)

Built a reusable Figma **component library** using **auto-layout**, adopted across client projects, cutting development handoff time by **~20%**

Redesigned **e-commerce** experience; new **dashboard flow**, **optimized** quantity selector, and a **combo-purchase feature** to support upselling

Produced conversion-focused social creative for client brand campaigns, aligned to marketing goals alongside core UX work

Mentored design interns on process and tooling

Matrix Innovation | UI/UX Designer

Apr 2024 – Oct 2024 | Lucknow (Hybrid)

Designed an **admin dashboard** for a dating app, consolidating user logs, activity tracking, and analytics into a single-page layout that **improved admin efficiency**

EDUCATION

Bachelors of Computer Applications (BCA)

Amity University Uttar Pradesh, Lucknow Campus

2023 - 2026 | CGPA: 8.5

Intermediate (PCB)

Sri Chaitanya Techno School

2022 - 2023 | Grade: 83%

SKILLS

UX Research & Testing

User interviews, usability testing, competitive analysis

Product Design

0→1 design, wireframing, user flows, IA

Prototyping

Low-fi → interactive hi-fi Figma prototypes

Design Systems

Component libraries, design tokens, guidelines

Visual & Interaction

UI design, micro-interactions, responsive, accessibility

Client Facilitation

Design reviews, workshops, stakeholder presentations

Front-End Basics

HTML, CSS, JavaScript

Ran user research and competitive analysis to shape early design decisions

Designed wireframes, user flows, and prototypes for responsive web applications, ensuring a seamless user journey

Partnered with senior designers and developers to keep designs aligned to usability standards through implementation

PROJECTS

ASAR.care – Medical Tourism Platform

UI/UX Designer • Freelance • March 2026

Owned **0 → 1 product design** of a **CMS** integrated responsive web platform, enabling scalable service and provider management

Structured **SEO-driven content architecture**, improving service discoverability and organic visibility

Applied **systems thinking and decision design** to simplify complex, multi-service user journeys

Improved task success rate and reduced completion time by **~20–25%** through usability-driven iterations

Designed for a **multi-sided marketplace model**, aligning user needs with provider visibility and conversion goals

Peepdo – C2C Quick Service Providing Platform

UI/UX Designer • Freelance • August 2025

Created the product from scratch, mapping core user flows and designing 50+ high-fidelity screens to ensure a logical, scalable Information Architecture.

Architected a **scalable UI component library** adhering to **iOS 17 Human Interface Guidelines (HIG)**, developed more than 10 components in addition to that.

Refined usability through 3 rounds of interface testing, identifying and resolving 15+ friction points to significantly reduce user error rates during task completion.

Amorr – Admin Dashboard for a Dating App

UI/UX Designer • Matrix • August 2024

Designed a **single-page** admin dashboard, consolidating user logs, activity tracking, and analytics into one streamlined view for the **internal team**

Simplified navigation and information hierarchy to reduce clicks needed for routine moderation and monitoring tasks

Aligned visual design with the app's brand identity while prioritizing data clarity and scan-ability for daily admin use

TOOLS

Design & Prototype

Figma • Framer

Visual & Production

Adobe Photoshop • Illustrator • Canva

LANGUAGES

English • Fluent — professional

Hindi • Native

Arabic • Conversational

German • Beginner (A1)

KEY STRENGTHS

- Leveraging AI in workflow
- Agile & cross-functional teams
- Multi-platform (mobile apps, websites, and web applications)
- Design-to-dev handoff
- Accessibility & inclusive design
- Fast iteration under ambiguity
